Donkey Amour with the Harmony Snaffle
Bridle, the Smart D Dressage Saddle and
the Sensitive Saddle Girth

Ninja Sosath and For Dance with the EVO-D Monoflap Dressage Saddle for maximum freedom of movement

Best Comfort and Optimum Horse-Friendliness

DRESSAGE

EVO-D

The monoflap saddle for maximum freedom of movement. With a PS Saddle Tree with deep and broad seat, Queen Special Feature, narrow twist and the super-soft seat lining. The moved-back points of the cantle give the saddle plenty of space and a comfortable seat with the center of gravity further forward. The soft, attached thigh supports on the flap give the leg the desired support. "The Lifter" Freedom Panels ensure an even contact surface, more freedom at the withers and excellent freedom of movement for the horse. Plenty of space with maximum support and the best possible control, combined with maximum comfort – simply EVO-D!

Sizes 16" to 19"

PS Saddle Tree

Art. no. 504

Compact Comfort

With its special PS Saddle Tree, the Compact Comfort combines a generously sized, comfortable seat with a particularly short contact surface on the horse. The enlarged seat provides more room thanks to the set-back cantle, while the deep seat with soft padding allows the rider to sit comfortably and close to the horse. The narrow, high thigh supports keep the legs securely in place and support an optimal leg position. The Queen Special Feature integrated into the saddle tree completes the overall feeling of comfort. For the horse, the saddle is especially horse-friendly: the Freedom Panels provide greater freedom for the withers and allow maximum freedom of movement.

Sizes 1 to 4

PS Saddle Tree

Art. no. 534

Optimum

The PS Saddle Tree used in our popular Optimum features a narrower twist combined with a widened tree in the seat area, ensuring especially close contact with the horse. This design allows the rider's seat bones to rest comfortably on the broader part of the tree, supporting an optimal riding position. The larger contact surface ensures an excellent fit, while the Freedom Panels provide greater freedom for the withers and ensure even pressure distribution across the horse's back.

Sizes 16" to 19"

PS Saddle Tree

Art. no. 550

Optimum Mono

As a monoflap saddle, the Optimum Mono allows riders to sit even closer to the horse. The Optimum Mono also features a narrower twist combined with a widened tree beneath the seat bones to provide a greater control and a comfortable, balanced riding position. The thigh supports on top of the saddle flaps are available in two versions, offering the best possible support. "The Lifter" Freedom Panels ensure an even and widened contact surface on the horse.

Sizes 16" to 19"

PS Saddle Tree

Art. no. 557

Sirius 2.0

NEW

The Sirius 2.0 with the PS Saddle Tree and frt-System® ensures that the horse's shoulder is able to rotate completely freely. The horses are happier and more relaxed, and riders report a particularly calm and harmonious sitting sensation. In addition, the Sirius 2.0 impresses with its comfortable, deep seat, elegant patent leather trim and a variable selection of Velcro thigh supports. The billet routing on the flank allows maximum flexibility in girthing, making it possible to find the correct girthing position for every type of horse. The Freedom Panels offer the horse an optimal contact surface and maximum freedom of movement.

Sizes 16" to 19"

PS Saddle Tree

Art. no. 566

Freemove Dynamic

The Freemove Dynamic is a true classic. The saddle with the classic PS Saddle Tree has a flat seat and a narrow twist, offering optimum freedom of movement for every rider. The flat thigh supports offer the legs plenty of room. The sloping, short flocking of the Freedom Panels and the straight girth straps relieve the horse's thoracic spine, enabling the back muscle to swing freely.

Sizes 16" to 19"

PS Saddle Tree

Art. no. 532

GG Extra

powered by Ingrid Klimke

The GG Extra was developed in cooperation with master rider and Passier partner Ingrid Klimke. With a classic PS Saddle Tree with narrow twist and a comfortable, deep seat, it offers direct contact with the horse. The modern look with sporty design leather inserts turns this popular model into a true highlight. The soft knee inserts with the convenient quilting together with the thigh supports provide optimal support for the rider's legs. The Freedom Panels ensure even contact surface on the sensitive horse's back. Team Klimke – also in the dressage arena powered by Passier!

Sizes 16" to 19"

PS Saddle Tree

Art. no. 531

Smart D

The elegant dressage saddle for a comfortable sitting sensation. The deep seat and the variable Velcro supports make it even easier to find the optimum riding position. Visual highlights are the shiny patent leather rear seam and the shiny patent leather stirrup strap loop. For absolute horse-friendliness the saddle is equipped with the popular Freedom Panels.

Sizes 16" to 18"

Synthetic Saddle Tree

Art. no. 528

long
thigh
block

Grand Prix Special

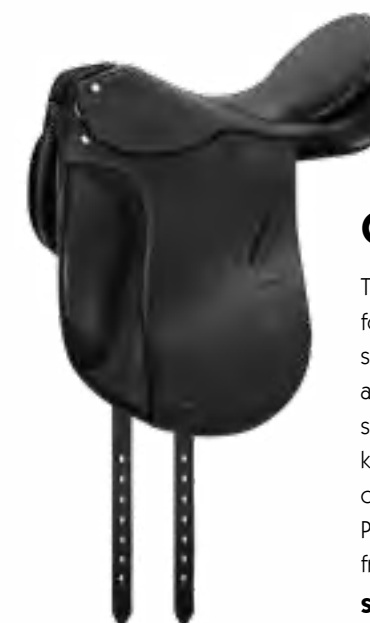

The monoflap saddle has an extra-deep seat with special deeper seat lining for an incredibly comfortable riding sensation. The flaps come with soft Deluxe Doubling, the small saddle flaps provide particularly good support thanks to their soft inserts. The saddle is available with short or long thigh blocks, just as needed.

Sizes 16" bis 18"

(Size 16" only available with short thigh blocks)

Synthetic Saddle Tree

Art. no. 620

Corona II

The saddle is softly padded for a particularly comfortable sitting sensation. The comfortable, deep seat, with its thigh supports under the pre-formed knee inserts provides extra-comfortable hold. The Freedom Panels ensure maximum horse-friendliness.

Sizes 16" to 18"

Synthetic Saddle Tree

Art. no. 521

Young Star II

Not just for young riders! A true favorite, thanks to its adjustable thigh supports with Velcro, soft seat lining and a deep seat. Elegant patent leather trims at front and back as well as the patent leather stirrup strap loop make this saddle a real eye-catcher.

Sizes 15.5" and 16"

Synthetic Saddle Tree

Art. no. 526

JUMPING

Top-Quality and Optimum Freedom of Movement

Connection

The modern jumping saddle with PS Saddle Tree for a comfortable sitting sensation with the center of gravity further forward. Thanks to the soft Deluxe Doubling of the saddle flaps and the narrow twist of the flat PS Saddle Tree, the saddle offers optimum seating comfort and direct contact with the horse. The slightly triangular knee blocks and the small thigh blocks provide support when jumping. Freedom at the withers, shoulder freedom, the flexible tip of the saddle panel and the PS Saddle Tree, which is flexible in the longitudinal axis ensure a first-class fit on the horse.

Sizes 16" to 19"
PS Saddle Tree
Art. no. 501

EVO-S

The EVO-S provides an exceptionally soft sitting sensation due to the soft inserts on the smalls saddle flaps and the seat lining that runs smoothly into the saddle flap. The PS Saddle Tree with narrow twist ensures a comfortable sitting sensation and especially close contact with the horse. The horse enjoys optimum freedom for the withers due to the wider gullet plate and excellent freedom for shoulder, spine and movement.

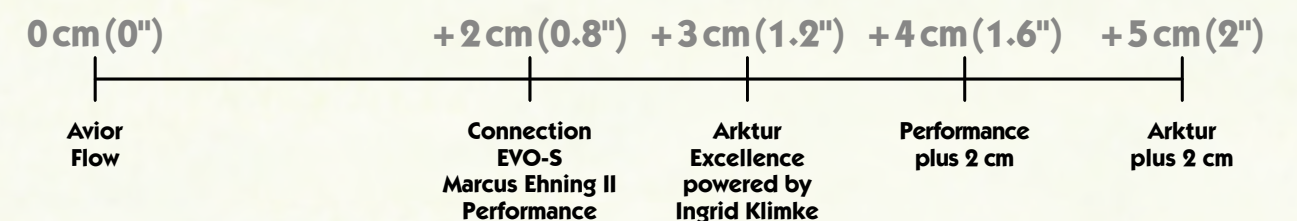

Sizes 16" to 19"
PS Saddle Tree

Cut of Jumping and Cross-Country Saddles

Cut + 2 cm (0.8")

Performance

The Performance, with its semi-deep seat, narrow twist, large knee blocks, small calf blocks, and non-slip leather with excellent grip, offers a secure riding sensation – and a stylish look. It is also available with an additional 2 cm (0.8") cut or with a flat saddle seat for perfect performance on the jumping course.

Sizes 16" to 18"

Synthetic Saddle Tree

Art. no. 513

NEW
Now available
with flat
saddle seat

Cut + 2 cm (0.8")

Arktur

The Arktur convinces due to its extra-soft, semi-deep seat. The soft knee inserts ensure optimum contact with the horse. The saddle flaps are softly doubled and thus especially slip-proof. Also available with flat seat and wider cut with an additional 2 cm (0.8").

Sizes 16" to 19"

PS Saddle Tree

Art. no. 518

Marcus Ehning II

The Marcus Ehning II was developed in cooperation with professional jumping rider Marcus Ehning. The wide, flat PS Saddle Tree ensures optimum contact with the horse. The softly doubled small saddle flaps, the large knee blocks and the small calf blocks provide excellent hold.

Sizes 16" to 19"

PS Saddle Tree

Art. no. 511

Avior

The Avior convinces due to its semi-deep seat and its comfortable sitting sensation. The pre-formed knee inserts and thick knee and calf blocks give the rider very good security, the decorative stitching completes the classy look.

Sizes 16" to 18"

Synthetic Saddle Tree

Art. no. 512

Flow

The Flow has stylish decorative stitching and a patent leather trim at the back of the small saddle flap. Additional highlights include a soft, non-slip flat seat, large knee blocks with Velcro, and small calf blocks.

Sizes 15.5" and 16"

Synthetic Saddle Tree

Art. no. 663

The Performance Jumping Saddle
impresses with its attention to detail

CROSS-COUNTRY AND ALL-PURPOSE

Cross-Country and All-Purpose Saddles – approved by Pros

Allround

This versatile saddle always looks perfect in every discipline: whether for dressage, show jumping or a leisurely ride across fields and meadows. With its PS Saddle Tree it offers sufficient freedom of movement while providing support exactly where it is needed, thanks to its adjustable Velcro supports. The modern cut, soft knee inserts, and comfortable fit make this saddle a popular all-rounder. One for all – naturally featuring Freedom Panels for the best possible support on the horse's back and absolute horse-friendliness.

Sizes 16" to 19"

PS Saddle Tree

Art. no. 093

Paxton

This all-purpose saddle with emphasis on dressage is an ideal saddle for beginners – and with its pleasant seat depth and versatile cut it is perfect for all uses. The knee rolls provide good security and guarantee freedom of movement.

Sizes 16" to 18"

Synthetic Saddle Tree

Art. no. 035

Excellence

powered by Ingrid Klimke

The perfect combination of modern look, ultimate comfort and uncompromising horse-friendliness. The PS Saddle Tree with narrow twist and broader seat enables optimum contact with the horse and the soft knee inserts and the calf blocks on top of the flap ensure perfect hold. The Freedom Panels provide an even contact surface and offer maximum comfort to the horse.

Sizes 16" to 19"

PS Saddle Tree

Art. no. 506

Highest Quality, Best Riding Sensation

Soft, Softer, Passier Leather

Leather is a premium natural product. At Passier the raw materials are subjected to rigid quality control. That is why Passier products are made exclusively from the best European cowhide. After passing the strict quality control the optimum sections are chosen from each hide, in order to ensure the highest quality for the products.

Small visible scars, insect bites or neck folds underline the natural quality and sustainability of the chosen quality leather. The quality and longevity is not diminished by the natural leather features. Rather, these are visual indications of the natural and sustainable farming methods under which the animal has been raised and kept.

With proper care Passier products have a very long lifespan and will retain their natural and classy appearance for many years or even decades.

Natural Grip Leather (NGL)

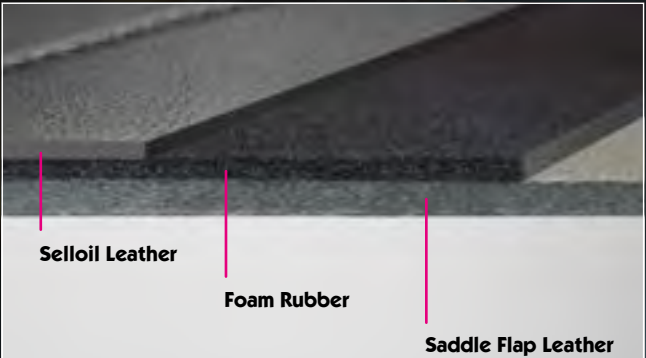

Natural Grip Leather is a very soft saddle flap leather with excellent grip. It is tanned with a selection of natural waxes und precious vegetable and animal oils and is used in the construction of all Passier saddles with PS Saddle Trees without doubling. Natural Grip Leather is available in the colors Black and Havana. At an extra charge it is also available for saddles with Synthetic Saddle Tree, Art. no. 087.

Cowhide

This high-quality saddle flap leather is used in all Passier saddles with Synthetic Saddle Tree. It is a very hard-wearing and durable leather which has been in use at Passier for more than ten years in constant high quality. Cowhide is available in the colors Black and Havana.

Selloil Leather

Selloil Leather combines an extraordinary softness with a secure grip. It is used on seats, knee inserts and panels. It is exceptionally slip-proof, offering the rider comfort and security in the saddle while also keeping the saddle securely in place. Selloil Leather is available in Black and Havana.

Selloil Leather

Foam Rubber

Saddle Flap Leather

Deluxe Doubling

The extra-soft Deluxe Doubling ensures an exceptionally soft riding sensation. The secret: between saddle flap and soft Selloil outer leather a soft foam rubber insert of 2 mm (1/12") has been added. The result is unique: maximum grip and at the same time ultimate comfort!

Art. no. 088

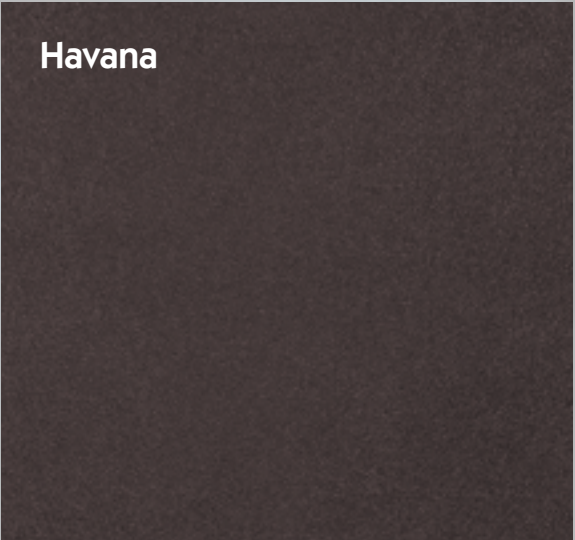

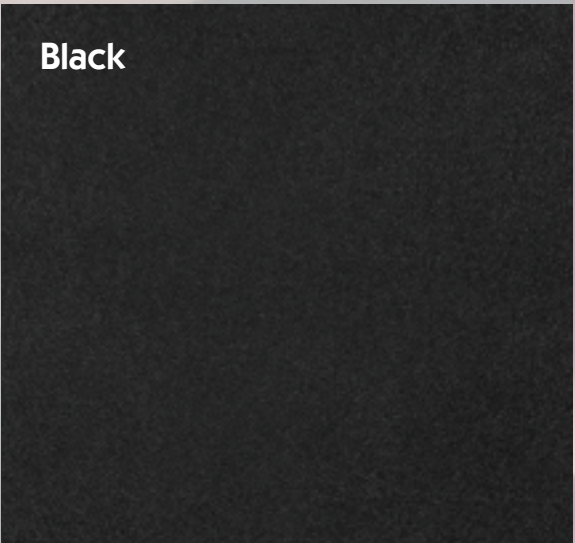

Elegant, Natural and Timeless

Leather Colors

Passier saddles are available in the colors Black and Havana. Seams are available in a variety of colors, saddle applications in many additional colors, see pp. 28/29.

Take note: genuine leather is a natural product. This means that each hide will absorb the dye differently. This results in differing nuances in the nominal color. These nuances give Passier saddles, bridles and accessories their unique, natural and elegant look.

For all colors best possible color fastness and color stability are of utmost importance – and given the correct care the stability of the colors can be guaranteed.

Two Saddle Trees with Countless Amazing Features

Passier Saddle Trees – Especially Horse-Friendly

PS Saddle Tree

Each PS Saddle Tree is constructed by hand by Passier master saddlers in Langenhagen, Germany. More than 1,200 steps are necessary for the production. The main materials are wood and leather. Saddle models with PS Saddle Tree are available in seven different sizes: from 16" to 19".

Regular Gullet Plate
The width of the gullet plate can easily be adjusted – several times, if necessary!

Wider Gullet Plate
The wider gullet plate is used for horses with high and bony withers and offers optimized wither clearance in the longitudinal bend. Available for saddles with PS Saddle Tree.

Art. no. 080

frt-System®
The frt-System® with anatomically-formed gullet plate bars lets the horse's shoulder move freely. Available for saddles with PS Saddle Tree.

Art. no. 051

Queen Special Feature

The cut out at the front of the saddle tree, right in the pubic area under the soft seat reduces pressure and makes the saddle extra-comfy and super soft. Available for all saddles with PS Saddle Tree.

Art. no. 081

Cante Widened by 15°

This cantle offers the rider more room and freedom of movement with the same seat size. This allows you to go a full size smaller for horses with short backs! Available for all Dressage Saddles with PS Saddle Tree.

Synthetic Saddle Tree

The Synthetic Saddle Tree is made of an elastomere, which cannot break under normal conditions and can therefore respond to the highest demands. Passier saddles with Synthetic Saddle Tree are available in five sizes from 16" to 18".

The wide construction of the head of the saddle tree offers great freedom on the sides for the withers.

The narrow twist of the Synthetic Saddle Tree ensures very close contact to the horse.

The edges on the sides are very smooth, supporting the impression of a narrow twist.

The pointed ends of the cantle are situated close to the back. This creates plenty of room in the seat allowing riders to position perfectly.

Quality Made by Master Craftsmen in Germany

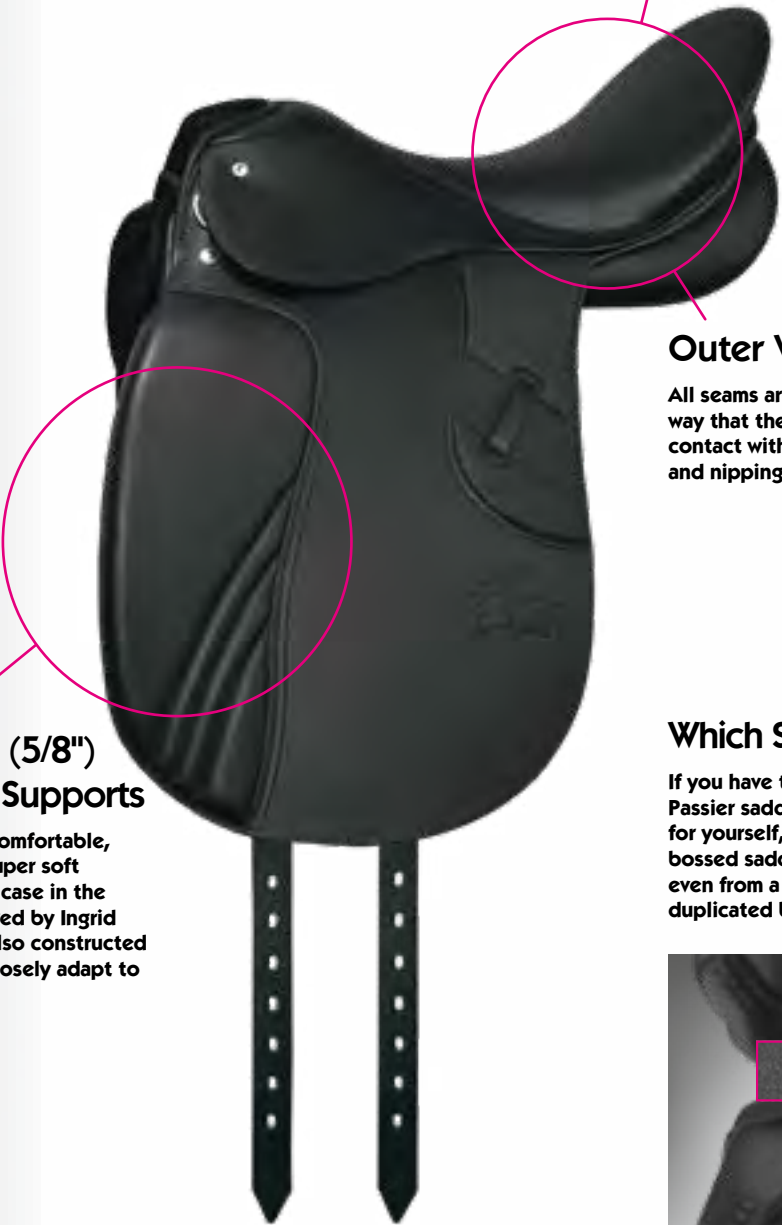

Passier Saddles – High-Class Sitting Sensations

Softer Seat Lining

Invisible to the eye, special attention is paid to the "inner values": the current Passier seat lining is based on state-of-the-art technology – for a wonderfully soft, unforgettable riding sensation: the unique Passier feeling!

The seat lining is sanded into shape by the master saddler. Individual and wonderfully soft!

Outer Welt Seam

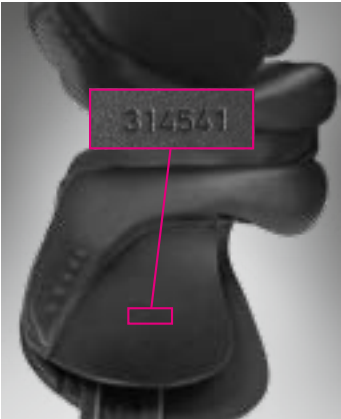

All seams are placed in such a way that they do not come into contact with the rider. No pinching and nipping. Guaranteed!

Knee Inserts 15 mm (5/8") and Very Soft Thigh Supports

The knee inserts are especially comfortable, because they are padded with super soft 15 mm (5/8") material like in this case in the GG Extra Dressage Saddle powered by Ingrid Klimke. The thigh supports are also constructed from very soft materials, which closely adapt to the shape of the rider's knee.

Which Saddle is This?

If you have tried out or seen a Passier saddle that you would like for yourself, simply check the embossed saddle number. Each saddle, even from a past collection, can be duplicated based on this number.

A wonderful, soft Passier seat with non-slip seat leather that is being drawn out over the saddle tree by hand by our Master Craftsmen in Langenhagen.

Passier Saddle Panels – Unbelievably Convenient

Synthetic Wool
Passier panels are all filled with synthetic wool, which has unique advantages: it does not absorb liquid and maintains its elasticity and softness when in use, there is no formation of clumps during flocking, and it has high re-set properties. Passier saddle panels, therefore, are very elastic and very horse-friendly.

10 mm (3/8") Latex Insert
This practical insert ensures extremely soft, smooth contact between the saddle and the horse's back. Furthermore it helps to evenly distribute the rider's weight on the horse's back. The horse-friendly insert is a standard feature of all Passier saddles.

Flat, Medium, High Gusseted Panels
The Gusseted Panels at the back enlarge the contact area of the saddle panels and improve the fit of the saddle. Later adjustments can be performed easily. Compared to Medium Gusseted Panels, the height of Flat Gusseted Panels is reduced by 10 mm (3/8"), while the height of High Gusseted Panels is increased by 10 mm (3/8").

"The Lifter"
The perfect saddle panels for horses with high withers and lowered back (with the rump sloping into the back), which require additional height in the rear area of the panel. "The Lifter" Panels with their short, round form at the rear come off the horse's back quickly and therefore exert no pressure.
Art. no. 083

Front Gussets
Front Gussets increase the volume of the padding in the front of the saddle. The use of Front Gussets thus is ideal for horses with hollow sides, which can be evened out with the additional volume of the Front Gussets.
Art. no. 043

Freedom Panels
The Freedom Panels, which were developed by Passier are a standard feature of all Passier saddles. They offer more room on the right and left of the horse's withers while the front third of the channel is especially wide, thus creating more freedom of movement for the horse.

Many Possibilities, the Perfect Solution for Every Type of Saddle

Passier Strap Arrangements – for the Optimum Saddle-Fit

Different needs of various horse types require different strap arrangements. Each strap arrangement is available for every saddle type. We fit two long straps on dressage saddles and three short straps on jumping and eventing saddles. An additional third long strap or an additional point strap on jumping and eventing saddles is available at an extra charge (Art. no. 041). The installation of an additional girth strap to allow easy conversion from saddle straps to nail straps is available at any time at no extra cost.

2 x 70 cm (28") Billet Straps incl. Point Billet Strap

Point Billet Straps

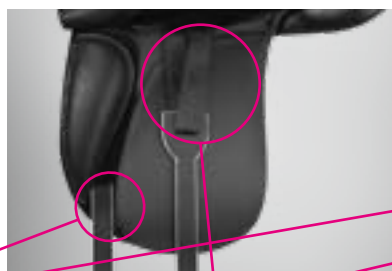

Point billet straps help to stabilize the saddle behind the shoulder blades, making them ideal for round horse types with low withers. In versatile work and when riding out, the point billet strap also helps keep the saddle securely in position. The pulling force is absorbed at the strongest point of the saddle tree.

Sirius 2.0 Girth Arrangement

Maximum variability in strap configuration: point billet strap, nail strap, and rear V-girth arrangement allow direct adjustment to any required girthing option. In addition, each individual strap can be secured via a keeper. Available exclusively for Sirius 2.0.

Point Billet Strap, V-Girth Arrangement at Rear

V-Girth Arrangement

With the V-Girth Arrangement, the pulling force is evenly distributed across two points, stabilizing the position of the saddle. The V-Girth Arrangement is also suitable for sensitive horses, as it reduces concentrated pressure points. It can be fitted as a front or rear strap, a combined W-Girth Arrangement is also possible. Pressure on the horse's belly is distributed evenly, allowing the saddle to sit more securely without the need for tighter girthing.

Nail Straps

The nail straps relieve pressure in the area directly behind the shoulder – for horses with large shoulders and active forehead action.

Straight Center Strap

The classic straight, center strap arrangement ensures even pressure distribution. It is positioned centrally within the girthing arrangement. With its straight-running straps, it is suitable for a normal girth position.

3 Short Straps

Straight Point Billet Strap, Strap on Seat Bottom

The additional fixation of the point billet strap allows it to run very straight downward. This provides the saddle with even greater stability and reduces forward slipping. Stabilization becomes more direct, the strap cannot twist, and the saddle remains evenly aligned.

W-Girth Arrangement

Straight Girth Arrangement

The Perfect Supports, Blocks & Rolls for Every Use!

Passier Supports, Blocks & Rolls – secure & stable

Thigh supports, knee and calf blocks and knee rolls provide security and stability in the saddle and help riders to hold themselves securely. Passier offers an exceptionally wide variety, differing from saddle model to saddle model. Customized versions are available on request and at extra cost. On request all saddle models can also be outfitted with Velcro supports, blocks & rolls.

All passier supports, blocks & rolls are also available with Velcro fastening! Art. no. 055

Boundless Breastplate powered by Julia Krajewski

The softly lined and anatomically-formed breastplate was developed in cooperation with Eventing Olympic Champion Julia Krajewski. The breastplate combines ultimate comfort and freedom of movement in canter and jumping phases. Martingale attachment and jumping strap are removable.

Size One size fits all
Fittings Black with stainless steel, Havana with stainless steel or brass
Art. no. 681

Martingale

The Martingale is highly convenient and variable. The martingale attachment can be removed and re-attached easily by a snap hook. The flash strap also comes with a snap hook for easy attachment to, or removal from, the saddle girth. A small leather stopper ensures the neck ring remains in position.

BRIDLES

NEW

Harmony Snaffle Bridle

The new round Harmony Snaffle Bridle combines exclusivity and timeless elegance. The head piece is anatomically-formed and softly padded, reducing the pressure on the horse's sensitive poll. The anatomically-shaped Caveson Special is softly lined and with its elegant trim turns the snaffle bridle into a true eyecatcher. The waved browband with extra-large Premium Crystals in Clear Crystal completes this dream of a snaffle bridle.

Fantastic Snaffle Bridle

The Fantastic Snaffle Bridle is absolutely horse-friendly. The anatomically-formed head piece is softly lined and well padded around the sensitive ear cartilage of the horse. Furthermore the fantastic-elastic joint on top of the poll leaves plenty of room for the horse's cervical vertebra. The elastic joint makes riding in contact so much more comfortable for the horse and tongue problems can be avoided, too. The anatomically-formed noseband leaves room for cheekbone and facial nerve of the horse. The waved browband with big sparkling Premium Crystals in the color Emerald Green completes the brilliant look.

Move Snaffle Bridle

powered by Julia Krajewski

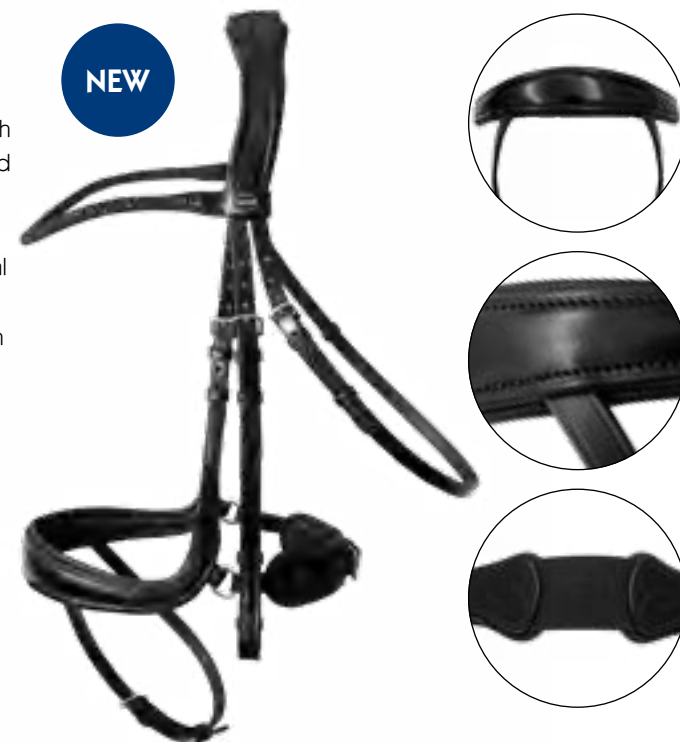

The Move Snaffle Bridle was developed in close collaboration with Julia Krajewski and sets new standards in comfort, functionality and design. The anatomically shaped, softly padded head piece with elastic inserts ensures optimal pressure distribution, while extra padding protects the horse's sensitive ear cartilage. The anatomical noseband with cheekbone clearance leaves room for the facial nerve, while the ergonomically positioned flash strap ensures even pressure distribution without any pressure points and allows for unhindered breathing. The browband with extra-large Premium Crystals in Graphite emphasises the elegant design.

The Trapezius Relief Pad (TRP) is made from comfortable felt, the shell from easy to clean cotton.

Trapezius Relief Pad (TRP)

The TRP was developed in cooperation with dressage trainer Eberhard Weiß. It distinguishes itself from conventional pads by means of the two special recesses in the sensitive rearward part of the trapezius muscle. These oval recesses provide demonstrable pressure relief: the horse can breathe more freely.

Furthermore, the pad encourages better back activity and relaxation and supports muscle development and can also be used prophylactically against over-sensitive reactions to the saddle.

Best Quality Between Horse and Saddle!

Horse-friendly Passier Saddle Pads

Lambskin Pad

This anatomically-shaped, hard-wearing pad made of vegetable-tanned lambskin has highly therapeutic benefits and offers many advantages: It is shock absorbing and effectively prevents formation of pressure points therefore making it perfect for horses with sensitive backs.

The pad also promotes circulation and alleviation of tension and is also beneficial for horses prone to allergies.

The underside of the pad consists of lambskin with 25 mm (1/10") deep pile. The outer side is made of cotton.

From Lunging Accessories to the Best in Saddle Care

Attractive Accessories

Lunging Bridle

The new Passier Lunging Bridle combines functionality and design in proven Passier quality. The soft, anatomically shaped head piece ensures even contact and optimum pressure distribution on the horse's sensitive poll. A softly padded noseband with lunging function allows you to quickly switch from lunging with a cavesson to riding without having to change the bridle. Simply buckle the lunge to the side rings or the central ring – and you're ready to go! The noseband allows you to lunge without putting pressure on the bit. For an optimal and secure fit, the noseband is softly padded and equipped with an additional throat latch. A waved browband with big Premium Crystals in graphite completes the design of this functional bridle.

Care Products

Every quality product requires particularly good care in order to preserve its high quality properties for as long as possible. For the correct care of Passier saddles, bridles and accessories, it is therefore important to use Passier Saddle Soap and Passier Lederbalsam exclusively. This is the only way of guaranteeing correct care of the exclusive Passier products. All Care Products are especially sustainable due to their packaging!

Lederbalsam Art. no. 913 Saddle Soap Art. no. 915

Passier Dealer Special

From an order quantity of 250 pieces the Saddle Cover and the Stirrup Bag can be designed individually for an extra attractive look!

Stirrup Bag

This practical small bag made from heavy-duty Ripstop with soft Fleece lining securely covers the stirrups and also protects the valuable leather of your saddle from scratches. With elastic band and stirrup leather lead through.
